We don't the extent of contamination, so difficult to anticipate what needs will be.

Subject: Fruitland Magnesium Fire Site

Good Morning Dan and Mohsen,

I wanted to check in with you to ask if Region 9 and DTSC have agreed on the entity that will make the determination that the site is cleaned.

My understanding is that CalRecycle is removing the solid waste. Region 9 is conducting a removal action on the hazardous substances. However, the removal

action may not meet all state standards, which could result in additional cleanup needs following the removal action, in order to meet state standards. I've attached Region 9's cleanup plan for the site to this message.

Dan or Harry, if this question has already been resolved, could you please send a quick note to that effect? And, I apologize for putting another message into everyone's inbox.

If it has not yet been resolved, I've cc'd Bonnie to help set up a time for us to talk.

The state is responding to a letter from Rep. Roybal Allard's office, and we'd like to include an answer to this question in the reply letter.

Thanks very much,

Grant
